

Performance Pinball – Pikachu Tail Mod Installation Instructions

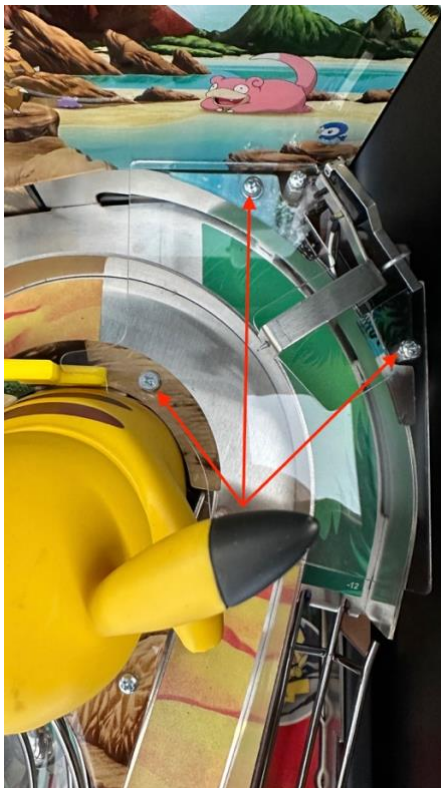

Tools needed:

Phillips head screwdriver

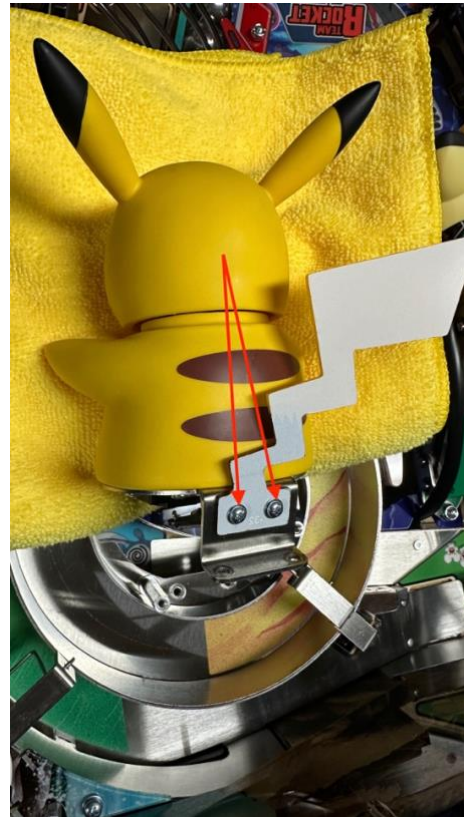

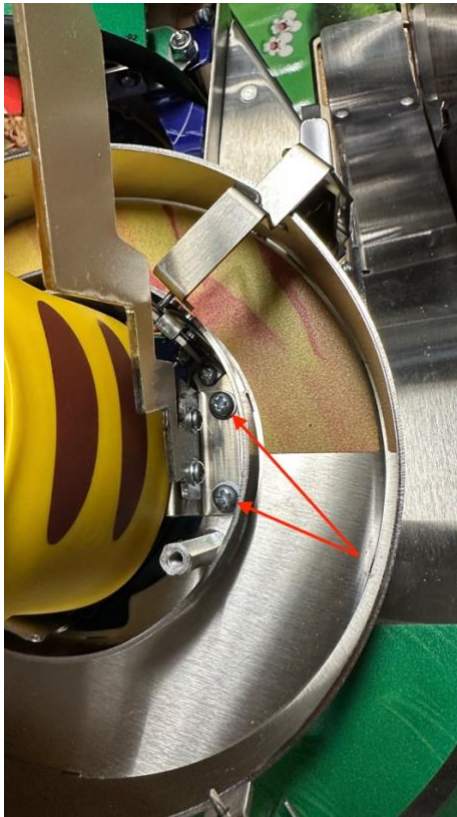

Optional - Performance Pinball Playfield Jacks

Step 1 - Remove glass and move playfield forward into the service position

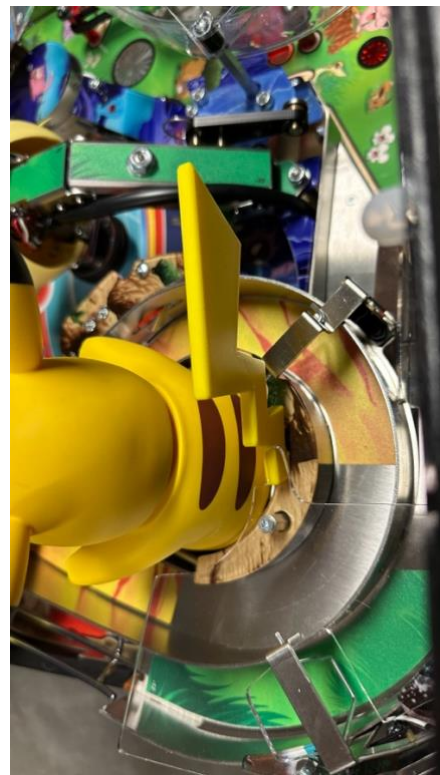

Step 2 - Remove the Phillips head screws for the clear and printed plastics, set screws and plastics aside

Step 3 – Remove the 2 screws retaining the Pikachu mechanism and lay the Pikachu mechanism on a soft towel. Remove the plastic tail piece via 2 Phillips screws.

Step 5 – Install the new Pikachu tail mod by screwing in the 2 new hardware screws provided and pre-set. Reverse the disassembly process to install.

Your clear plastic protector will bend up slightly when the crew is tightened. This is ok and was designed to act as a ball trap mitigator.

Your game is now ready to enjoy!
